THE VAULT PRO SCOOTERS SCOOTER ASSEMBLY

Your new scooter will usually arrive 90% assembled. The Vault Pro Scooters recommends having your scooter assembled by a professional scooter tech, but you may complete assembly on your own with minimal tools in approximately 10 minutes.

Follow these step-by-step instructions carefully to ensure proper assembly.

THINGS YOU NEED...

Tools you need are provided by the manufacture. Tools required vary between manufacturers.

1. Hex keys sizes 5 and 6
2. Scissors (To open the box)
3. 13mm wrench
PAGE 2

GETTING STARTED...

After opening the scooter box, your scooter should look similar to the photo. Please be aware that packaging varies from each manufacturer.

STEP 1: REMOVE ITEMS FROM BOX.

Remove all plastic, cardboard, zip ties and bubble wrap with care to avoid scratching the frame or other parts.

STEP 2: ATTACH THE FRONT WHEEL.

Push the axle through the fork and wheel.

STEP 3: TIGHTEN FRONT WHEEL.

Use your hex key and/or wrench to completely tighten the front wheel on the fork. *Remember, rightly tighty, lefty loosey.

STEP 4: ATTACH THE BACK WHEEL.

Slide the back wheel through the dropout, same way as you did with the front wheel.

ALMOST THERE...

STEP 6: ATTACH BACK AXLE.
Slide the back axle through the dropout and wheel, like done in step 2.

STEP 7: FINGER TIGHTEN NUT.
Fit the nut straight over the tip of the bolt and begin finger tightening it over the threads by turning the nut clockwise. Ensure that the nut is not crooked, or you may strip the bolt's threads.

STEP 8: TIGHTEN BOLT.
Tighten the bolt onto the nut. Apply firm and even pressure to the wrench handle as the nut gets tighter to ensure a snug fit.

STEP 9: ATTACH HANDLEBAR.
Slide your bars into the SCS clamp. Make sure the handlebars are straight and lined up with the front wheel to avoid danger while riding.
FINAL STEPS...

STEP 10: TIGHTEN CLAMP

Tighten your SCS clamp by starting with the bottom bolt and moving your way upward. Tighten all the bolts evenly to ensure the clamp is drawn together uniformly.

THERE YOU HAVE IT!

You're ready to go out and shred the gnarrrr!!
